- **Size:** Support customization of conventional sizes, and can also design non-standard sizes on demand to meet personalized needs
-

Product Advantages

1. High Quality Control

Implement ISO9001 quality management system in the whole process. From raw material procurement, printing production, post-processing to finished product delivery, each process is inspected by special personnel to prevent defective products from leaving the factory. Adopt environment-friendly soybean ink, meet EU ROHS and FSC environmental protection certifications, non-toxic and odorless, suitable for sensitive industries such as food and cosmetics.

2. Advanced Equipment

Equipped with imported high-speed offset presses, digital printing machines, laminating machines, bronzing machines, binding machines and other complete sets of automatic equipment, with high printing accuracy and fast production efficiency. We can undertake large-volume urgent orders and long-term orders to ensure on-time delivery.

3. Customized Service

Support custom design with provided pictures, sample processing, free typesetting design (for large-volume customers). One-to-one docking throughout the process, tailor-made suitable printing solutions according to customers' budget, purpose and style needs, to meet personalized and differentiated customization needs.

4. Cost-Effective

Direct production and sales from the source factory, eliminating the price difference of intermediate links, and more preferential prices for mass production. Large-scale production reduces costs, and at the same time strictly controls quality to achieve high quality and low price, helping customers control costs and enhance market competitiveness.
